Drape Backdrop

How to setup the drape backdrop:

For each backdrop you will be given two large base plates, two 8' upright poles, one adjustable crossbar, and eight curtains. Two of the curtains will come pre-assembled in rosettes and one will be pre-assembled for the swag.

Setup:

1. Extend the adjustable crossbar to 10' (two "clicks") and lay the crossbar on the ground where the backdrop will be set.
2. Slide both hollow upright poles into position on each base plate. The end of the pole with four slots on it should be in the air. Position the base plates on either side of the adjustable crossbar.

3. Sheer the five curtains onto the adjustable crossbar and use a ladder to insert the hook on both sides of the crossbar into the slots on both upright poles. It will be easier if you have a helper on the ground to space the base plates correctly.

4. Once the crossbar is attached to the upright poles, use your ladder to loop the pipe cleaner on both sides of the swag over the tops of the uprights. Tighten or loosen the pipe cleaner to adjust the drape of the swag.

5. Loop the pipe cleaner on the rosettes over the tops of the uprights and adjust the rosettes to the right "poof".
